

# Managing Pop-ups in Firefox for Mac

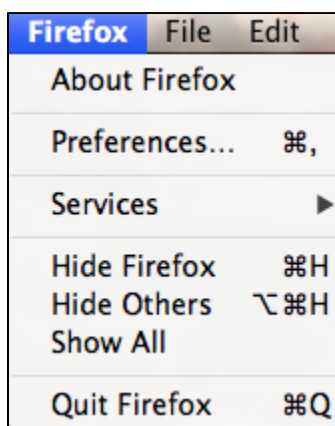

## Summary

Pop-up blockers prevent unwanted web pages from appearing on your screen while browsing the internet. However, sometimes necessary pop-ups are blocked by the system. The pop-up blocker can be disabled for certain sites. This article gives instructions on how to turn on/off the Pop-up Blocker and how to allow pop-ups for specific websites on Firefox for Mac.

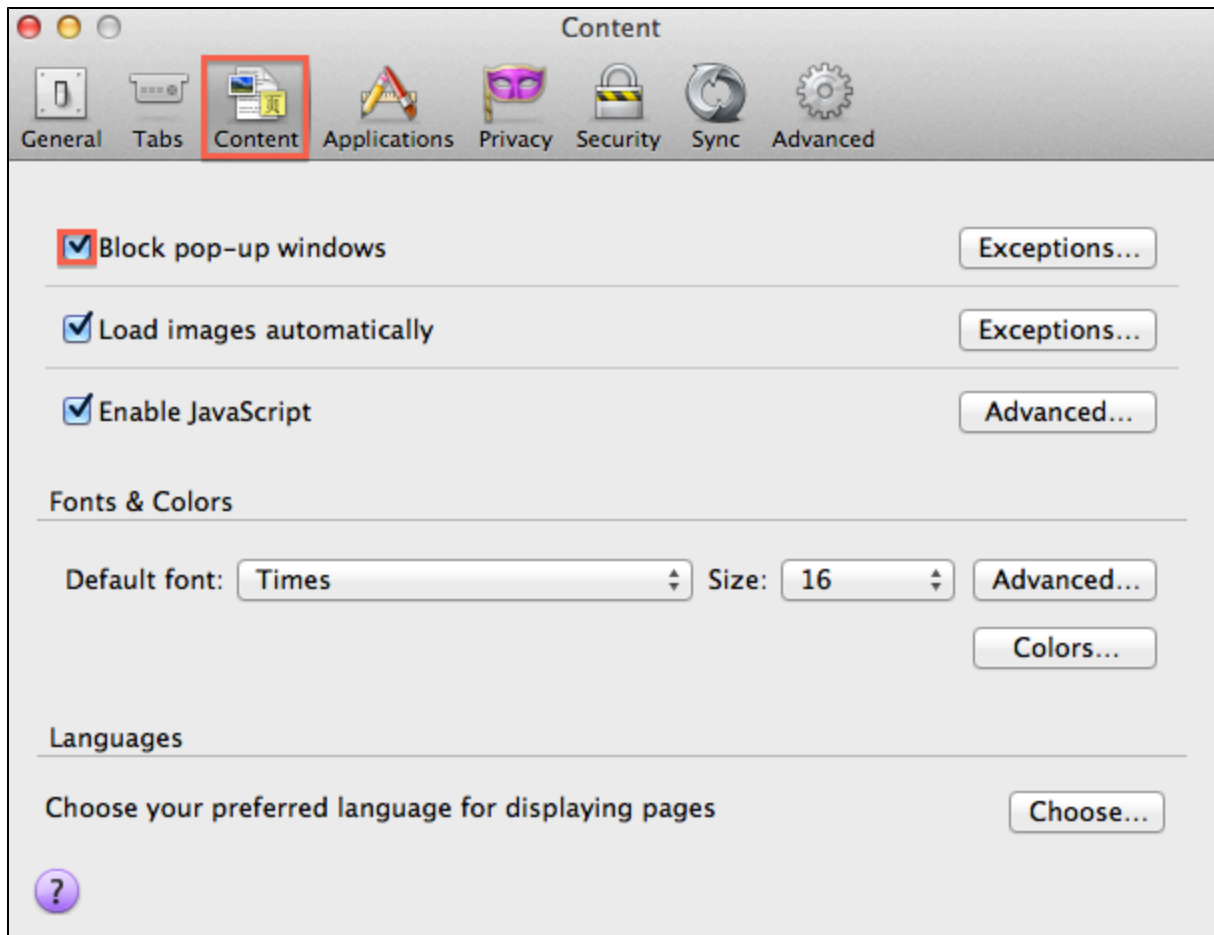

- [Disabling and Enabling Pop-up Blocker](#)
- [Allowing Pop-ups for Certain Websites](#)
- [Removing Websites from Allowed Sites](#)

## Disabling and Enabling Pop-up Blocker

1. Open Firefox and select **Preferences** from the Firefox dropdown menu.

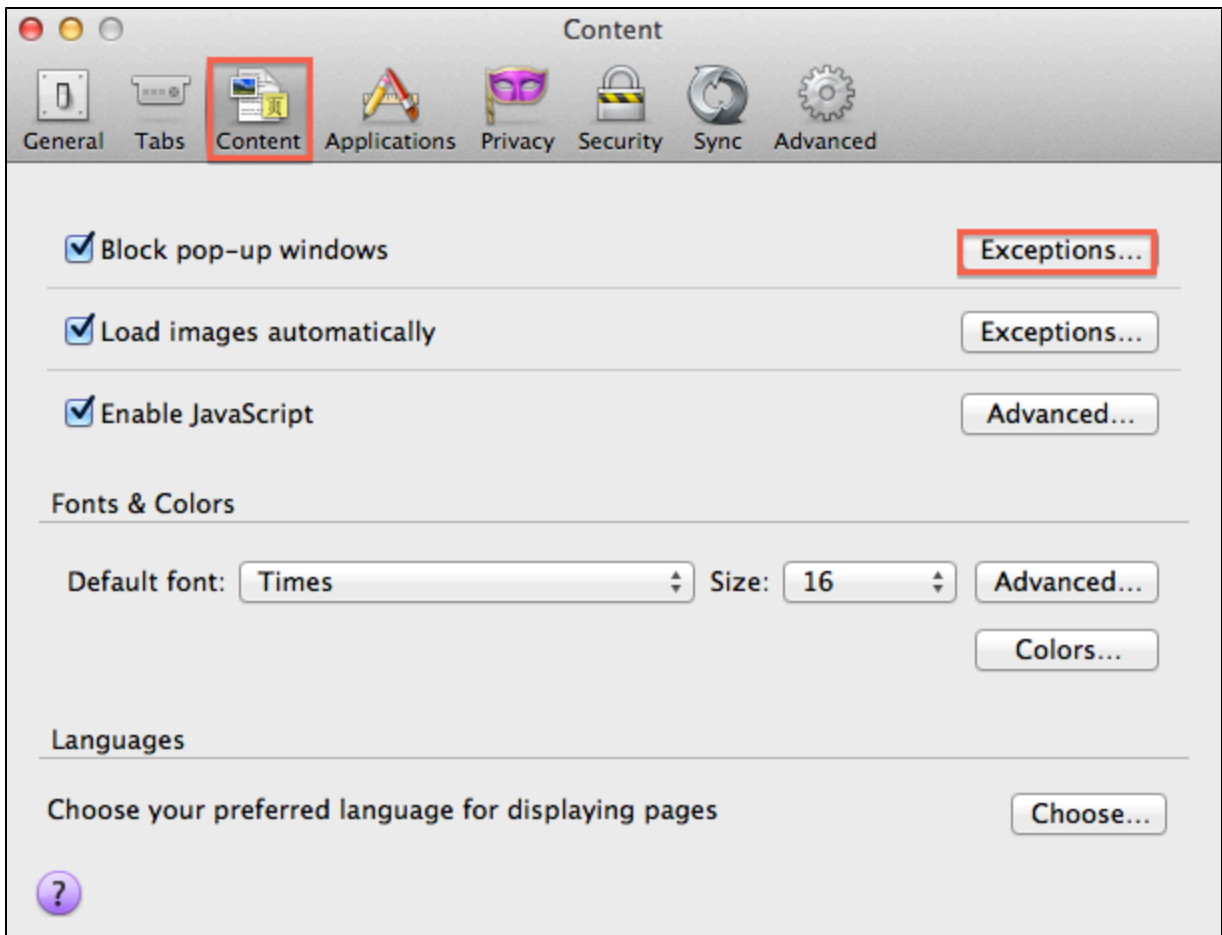

2. Select **Content**. You can enable pop-up blocker by selecting the checkbox **Block pop-up windows**, or disable pop-up blocker by deselecting it.

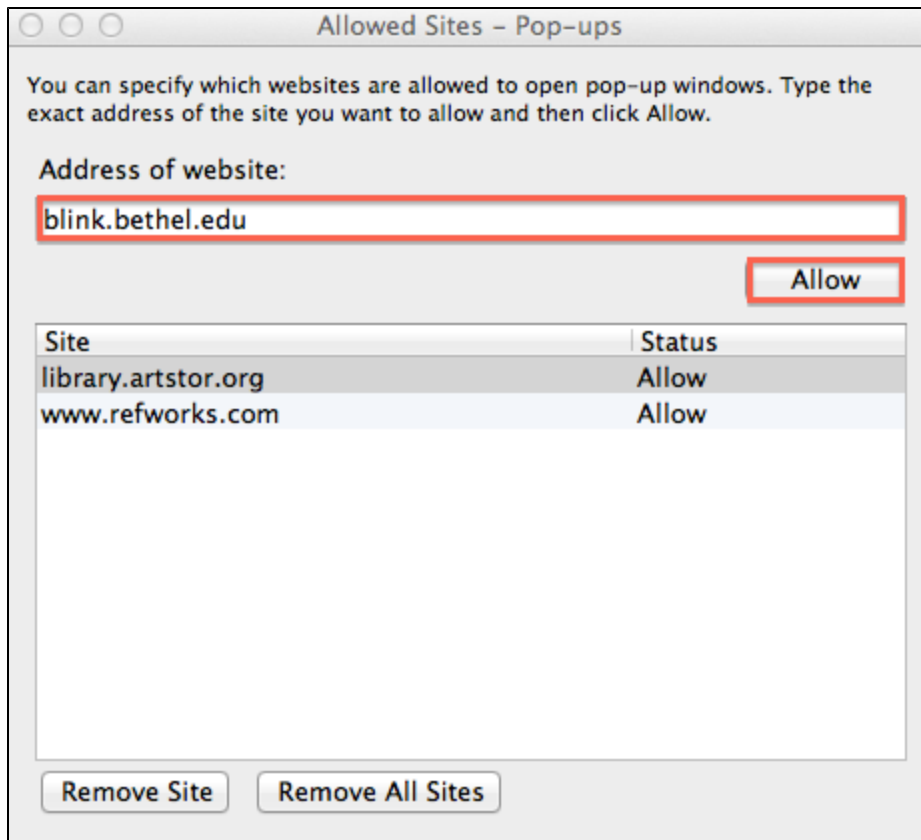

## Allowing Pop-ups for Certain Websites

1. Open Firefox and select **Preferences** from the Firefox dropdown menu.
2. Click **Content**. Then select **Exceptions**. (The exceptions option will only be available if you have turned on pop-up blocker.)

3. In the Address of website field, type in the address of the website you would like to allow pop-ups for. Then select **Allow**. You may close the window. Your changes will be saved.

## Removing Websites from Allowed Sites

1. Open Firefox and select **Preferences** from the Firefox dropdown menu.
2. Click **Content**. Then select **Exceptions**. (The exceptions option will only be available if you have turned on pop-up blocker.)
3. Select the address you would like to remove and select **Remove Site**. You may now close the window. Your changes will be saved.
