Moodle - Activity - Assignment - Using the Turnitin Plugin in a Moodle Assignment

Using the Turnitin Plugin in a Standard Moodle Assignment

Summary

A Bethel Moodle tutorial demonstrating how to use Turnitin within a standard Moodle Assignment. The key feature of this tool is that you can use all of the options for submission, feedback, and grading of the normal Moodle Assignment tool, but it also generates the Turnitin Originality Report. Of course if you wish you can also use all the Turnitin feedback and grading tools if you so wish as well. For information for learners and instructors please see the new Moodle Activity - Assignment - Turnitin Feedback Studio version for more information on creating and submitting Turnitin assignments in Moodle.

Turnitin End User License Agreement

Each user must accept the Turnitin End User License Agreement prior to the first submission of an assignment to any Moodle Assignment with Turnitin enabled. After accepting the Turnitin End User License Agreement once you should not see the request again unless Turnitin modifies their license agreement.

Step-by-Step Tutorial

| From the “Add an activity or resource” drop down ad an “Assignment”, | ![Add an activity or resource](image.png) The assignment act teacher to commun work and provide |
Fill in the Name and Description field for the Assignment.

Set your normal assignment settings. Turnitin does make use of the "Availability" section and selects the later of the "Due date" or the "Cut-off date" for both the Turnitin due and post dates. After the due date Turnitin reports will not be generated even if late assignments are allowed.

If you do not set at least the due date then Turnitin takes the dates listed anyway and reports will not be generated one month after Due date even if it is not "Enabled" from a Moodle perspective.

Scroll down and expand the Turnitin plagiarism plugin settings.
To view the turnitin originality reports once students have submitted their papers, just return to the assignment, click on View/grade all submissions, and scroll to the right on the Grading page or click on the icon in the Grade column just as you would normally review a student submission.
