

LiteShow

LiteShow Links

Software Downloads and Installs

Recommended Installation Procedure:

Download and install the LiteShow Manager app to your laptop or mobile device.

- The easiest way to install LiteShow is when you are in the classroom. Start up the projector or display and select Auxillary or LiteShow on the Extron Control Panel. Open a browser window and type in the address bar the IP shown on the projector screen to display the LiteShow Web Page.
- Then on the LiteShow web page, leave the Login set to None, leave the password field empty, and click the login button. Click download and select the Windows or Mac version to download and install.
- Open the Liteshow App, type in the IP address shown on the screen (140.88....), type in the Login code (4 digit number on the screen) and click start.

Be sure to CAREFULLY follow the steps on the LiteShow page displayed on the projector screen in the classroom, being sure to SKIP any request to "Connect to a access point" as you should already be connect to Bethel's Eduroam Network. For specific instructions for your room please see.

Known Issues

Windows Users - Auto WiFi Connect Dialog must be skipped or disabled - “Connect to a Access Point” - Click **SKIP**

When you start up LiteShow a "Connect to a AccessPoint" dialog appears. You **MUST click SKIP** for this option. Selecting Skip will not modify the computer's existing network connection to the Eduroam.

You can disable this by unchecking the "Auto WiFi Connect" option in the Liteshow Menu, which will prevent this box from appearing in the future.

Mac Users - LiteShow disconnects after 3- 5 minutes. Apple has an "App Nap" feature for background applications

Prevent “App Nap” - Control-click (right-click) on your Liteshow App in the Applications folder , select Get Info, and check the “Prevent App Nap” checkbox.

Lite Show Manager Application won't open on first use: Control-click (right-click) on your Liteshow App in the Applications folder and select open from the popup menu.

El Capitan requires version 2.02 of SoundFlower for Audio. [Download SoundFlower for El Capitan](#)
