

Quiet Hours and Courtesy Hours

The academic and physical health needs of the residents have priority over other considerations, and residents should maintain a sufficiently quiet atmosphere for adequate sleep and study. **Quiet hours are specifically enforced from 10 p.m. to 10 a.m. daily.** This means no excessive noise in the hallways or near the buildings. Proper noise levels must be contained within student rooms.

It is expected that residents will be courteous and respectful of noise levels in the residence halls during hours of the day. The responsibility for confronting residents regarding noise level does not belong exclusively to the Residence Life staff, but to all residents living in the building.
